

RIZWAN ALEEM TAHHA

Software Engineer | Web Developer | Graphic Designer

+92 3248215900 tahhaaleem@gmail.com Portfolio Karachi, Pakistan

SUMMARY

Passionate and Versatile Software Engineer with a strong foundation in Web Development, Graphic Design, and hands-on experience in AI/ML and full-stack development using HTML, CSS, JavaScript, and PHP (MySQL). Skilled in building responsive websites and creative visual content using tools like Adobe Illustrator, Photoshop, and Canva.

Known for blending creativity with technical expertise to deliver user-focused digital experiences. My background also includes experience as a Sales Representative, where I developed excellent interpersonal, communication, and negotiation skills—key to working with teams and clients effectively.

Continuously exploring new tools, frameworks, and methodologies to stay at the forefront of tech innovation and problem-solving.

EXPERIENCE

Sales Representative

Valvex International

(November 2024 – January 2025) Karachi, Pakistan

- Manage the end-to-end customer acquisition process for car detailing and duct cleaning services across the USA (Remotely).
- My responsibilities include designing and running targeted Facebook ad campaigns to generate qualified leads, engaging with potential customers to explain service offerings, and coordinating with on-ground technicians to schedule appointments.
- I ensure smooth handoff and client satisfaction while maintaining lead quality and conversion tracking.

Front-end Developer

CodeAlpha

(September 2024 – October 2024) Remote

- Designed and developed responsive, user-friendly websites using core front-end technologies including HTML, CSS, and JavaScript.
- Focused on creating visually appealing layouts and ensuring cross-browser compatibility.
- Collaborated on UI/UX improvements to enhance user experience across various devices.
- Maintained clean, well-documented code and followed best practices for performance and accessibility.

Front-end Developer

Persona SOHO

(August 2023 – September 2023) Karachi, Pakistan

- Implemented assigned web development tasks for client websites using front-end technologies such as HTML, CSS, and JavaScript.
- Translated UI/UX designs into functional, responsive web pages while ensuring consistency and performance across browsers and devices.
- Worked closely with senior developers and back-end teams.
